

Nowrosjee Wadia College
T.Y.B.Sc (Computer Science) Project
Academic Year 2020-2021

TOPIC : BAKERY ONLINE SHOP MANAGEMENT.
NAME : SONU CHAUDHARY.
ROLL NO : 12.
CLASS : T.Y.BSc(Computer Science).
DIV : A.
DEVELOPED BY :

GROUP NO : 13

- 1) 18 AKANKSHA DESHPANDE.
- 2) 12 SONU CHAUDARY.
- 3) 14 SAURABH CHOUDHARI.

Synopsis

Description:

- The main aim of this system is to handle the bakery shop in an efficient way.
- The system takes into account the transactions between customers and the shop, customer records, availability of products and much more.

Existing System:

- a) **System Title:** BAKERY SHOP MANAGEMENT SYSTEM
- b) **Software Used:** NONE(MANUAL SYSTEM)
- c) **Platform Used:** NONE
- d) **Database Used:** NONE {REGISTRATION BOOK}
- e) **Features:**

1) The customers go to the shop and places order at the counter.

- 2) The staff keeps the count of orders and enters it into the register.
- 3) The prepared order is given to the customer based on the sequence in which the staff remembers.
- 4) The payment done by the customer is then entered into the register by a staff member/worker.

f) Drawbacks:

- 1) Customers must visit bakery shop to buy the products unless and until the order amount is more than the shop's fixed amount for delivery.
- 2) Miscommunication between staff and customers happen often.
- 3) Most of the times the bakery product isn't available in the bakery so the customer has to visit another bakery. i.e. there is no guarantee for availability of product.

4) The existing system is time consuming due to manual calculation.

Need for new system:

- a) **Software required:** HTML/CSS,PHP7
- b) **Platform:** WINDOWS XP and above
- c) **Tools or IDE:** 1) VS CODE
2) XAMPP
3) GOOGLE CHROME BROWSER
- d) **Database:** POSTGRESQL
- e) **File System required:** Yes
- f) **Reasons for selecting this system:**
 - 1) It is not possible for people to visit bakery often.

2) The staff at a time may not keep a count of orders as well as mistakes may happen regarding the same.

3) If there are lots of customers in the shop some may feel ignored i.e. no customer satisfaction.

4) Staff also gets irritated by the customer's continuous demand for their order even before estimated duration which was told.

g) Features:

1) User Registration: User can register on the system and get his online account on site.

2) User Login: User can login to system and check various bakery items.

3) Product Categories: The bakery products are arranged and can be viewed in categories.

4) Add to Cart: Users can add new items to cart.

- 5) Custom Cake: User may order a custom cake as per his needed flavor, size and shape on site.
- 6) Card Payment: After total bill is calculated user can pay with any type of card online.
- 7) Confirmation: On successful payment a thank-you message is sent to user.
- 8) Online tracking: Users get an OTP which can be used at the time of receiving the order.

h) Types of End Users:

- 1) Customers
- 2) Manager

Feasibility Study

Technical Feasibility:

The technical feasibility focuses on existing computer hardware and software.

This includes evaluating, estimating, the need of more hardware and software.

As far as hardware and software are concerned, the propose system is completely liable with proper backup and security.

In our system we are using normal hardware rather than using any special type of hardware.

We are using open source software such as Xampp for PHP which is backend,HTML/CSS for frontend and PLPGSQL as database.

These being open source, the software is much cheaper.

Economical Feasibility:

This is the most frequently used method for evaluating of the proposed system.

The cost of hardware and software is affordable.

Easy and cheap maintenance of proposed system is possible.

In this system user will not require any special type of training, as this system consists of open software.

Here user can operate the proposed system without waste of time.

Operational Feasibility:

The system should be comfortable for the user to be used.

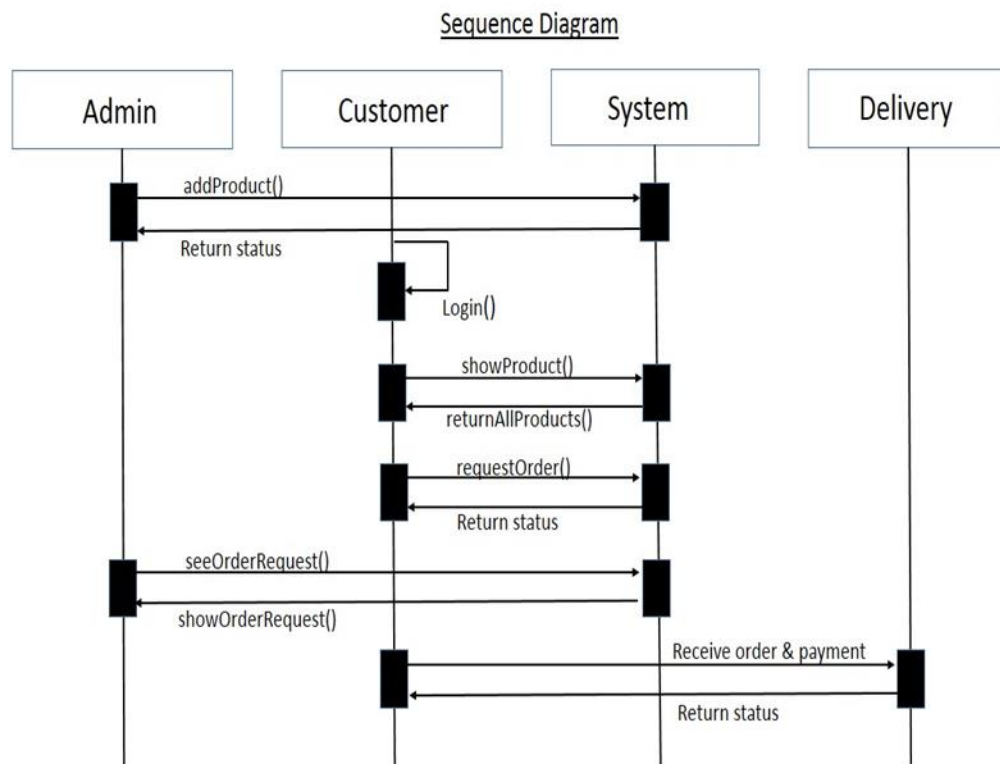

The GUI should be user friendly so that user can use it easily.

We follow the standard for Designing the UI, hence it will be easy for navigation of user.

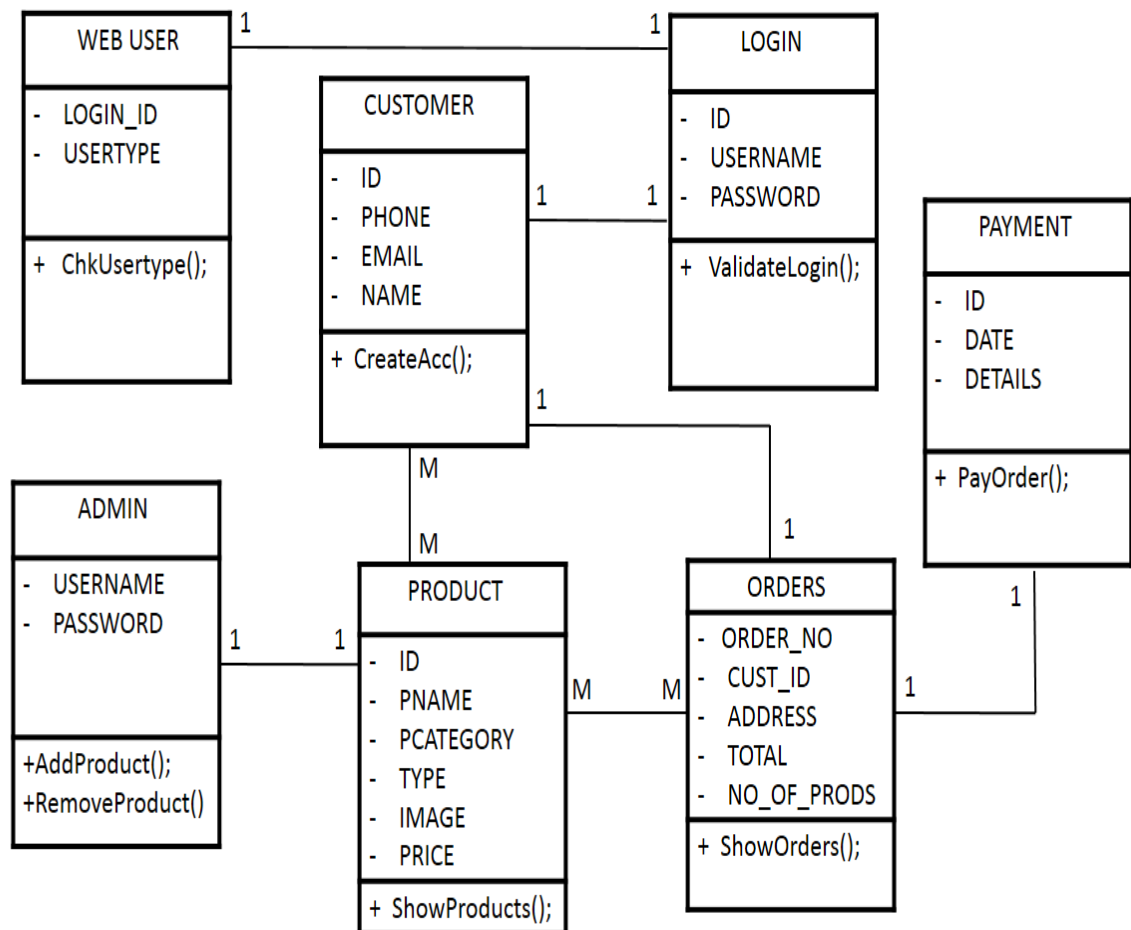

Self-explanatory user manual will be provided hence no specialized training required.

Behavioral Models

Database/File Design Form

Database name: POSTGRES

Relationship between tables:

Table1	Relationship	Table2
1) <u>Web User</u>	<u>1:1</u>	<u>Login</u>
2) <u>Order</u>	<u>M:M</u>	<u>Product</u>
3) <u>Customer</u>	<u>1:1</u>	<u>Order</u>
4) <u>Customer</u>	<u>M:M</u>	<u>Product</u>
7) <u>Customer</u>	<u>1:1</u>	<u>Login</u>
8) <u>Order</u>	<u>1:1</u>	<u>Payment</u>

Table name: Login

Field name	Field type	Description
1) <u>Lid</u>	<u>Integer</u>	<u>Unique Login Id.</u>
2) <u>Username</u>	<u>String</u>	<u>Name given by user</u>
3) <u>Password</u>	<u>String</u>	<u>User password.</u>

Table name: Web User

Field name	Field type	Description
1) <u>Lid</u>	<u>Integer</u>	<u>Login Id.</u>
2) <u>UserType</u>	<u>String</u>	<u>Admin/Customer.</u>

Table name: Product

Field name	Field type	Description
1) <u>ProductId</u>	<u>Integer</u>	<u>Product Id.</u>
2) <u>Name</u>	<u>String</u>	<u>ProductName</u>
3) <u>Category</u>	<u>String</u>	<u>ProductCategory.</u>
4) <u>Type</u>	<u>String</u>	<u>Veg/Non-Veg</u>
5) <u>Image</u>	<u>String</u>	<u>Product Image.</u>
6) <u>Price</u>	<u>Float</u>	<u>Price.</u>

Table name :Cart (3rd Table of Customer and Product)

Field name	Field type	Description
1) <u>CustomerId</u>	<u>Integer</u>	<u>Id of customer.</u>
2) <u>PID</u>	<u>Integer</u>	<u>Id of Product.</u>

3) <u>Quantity</u>	<u>Integer</u>	<u>Number of products.</u>
4) <u>Weight</u>	<u>Float</u>	<u>Applicable for Cakes</u>
5) <u>Status</u>	<u>Bool</u>	<u>Product order state.</u>
6) <u>Price</u>	<u>Float</u>	<u>Weight changed price.</u>

Table name : Order

Field name	Field type	Description
1) <u>OrderNo</u>	<u>Integer</u>	<u>Order number.</u>
2) <u>CID</u>	<u>Integer</u>	<u>Customer's id.</u>
3) <u>Address</u>	<u>String</u>	<u>Customer address.</u>
4) <u>Total</u>	<u>Float</u>	<u>Payment.</u>
5) <u>Pno</u>	<u>Integer</u>	<u>No. of products</u>

Table name : Customer

Field name	Field type	Description
1) <u>CustomerId</u>	<u>String</u>	<u>Customer's id.</u>
2) <u>Phone</u>	<u>String</u>	<u>Phone number.</u>
3) <u>Email</u>	<u>String</u>	<u>Email Id.</u>
4) <u>Name</u>	<u>String</u>	<u>Customer name.</u>

Table name : Order-Product

Field name	Field type	Description
1) <u>Oid</u>	<u>Integer</u>	<u>Order Id.</u>
2) <u>Pid</u>	<u>Integer</u>	<u>Product ordered.</u>
3) <u>Status</u>	<u>String</u>	<u>Payment Status.</u>

Table name : Payment

Field name	Field type	Description
1) <u>PaymentId</u>	<u>String</u>	<u>Payment id.</u>
2) <u>PaidDate</u>	<u>Date</u>	<u>Payment date.</u>
3) <u>Details</u>	<u>String</u>	<u>Payment details.</u>
4) <u>OrderNo</u>	<u>Integer</u>	<u>Order number.</u>
5) <u>FullName</u>	<u>String</u>	<u>Receiver's name.</u>
6) <u>Pin</u>	<u>String</u>	<u>Pin for delivery.</u>
7) <u>Landmark</u>	<u>String</u>	<u>Common Place.</u>
8) <u>Phone</u>	<u>String</u>	<u>Receiver number</u>

Screen Design Form

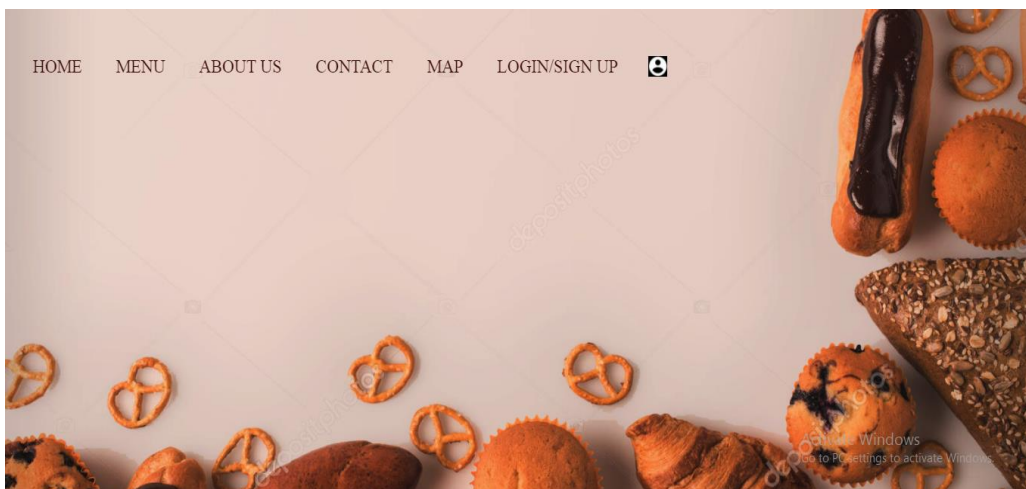

CUSTOMER SIDE:

(1)

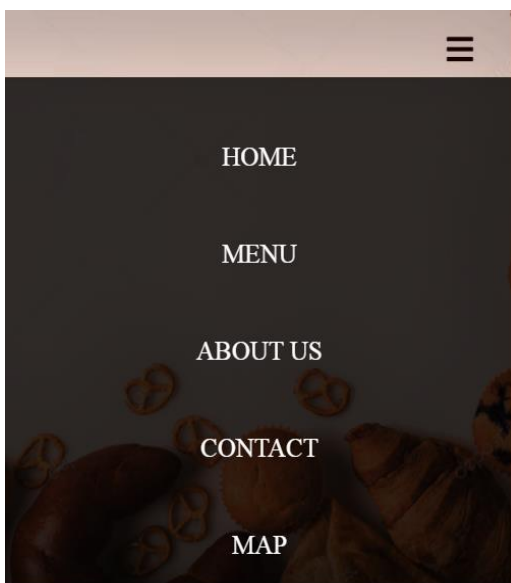

Screen name: CUSTOMER HOME PAGE.

Screen Input: HOME, MENU, ABOUT US, MAP, CONTACT, LOGIN.

Screen Output: HOME, MENU, ABOUT US, MAP, CONTACT, LOGIN.

In Tabular Form:

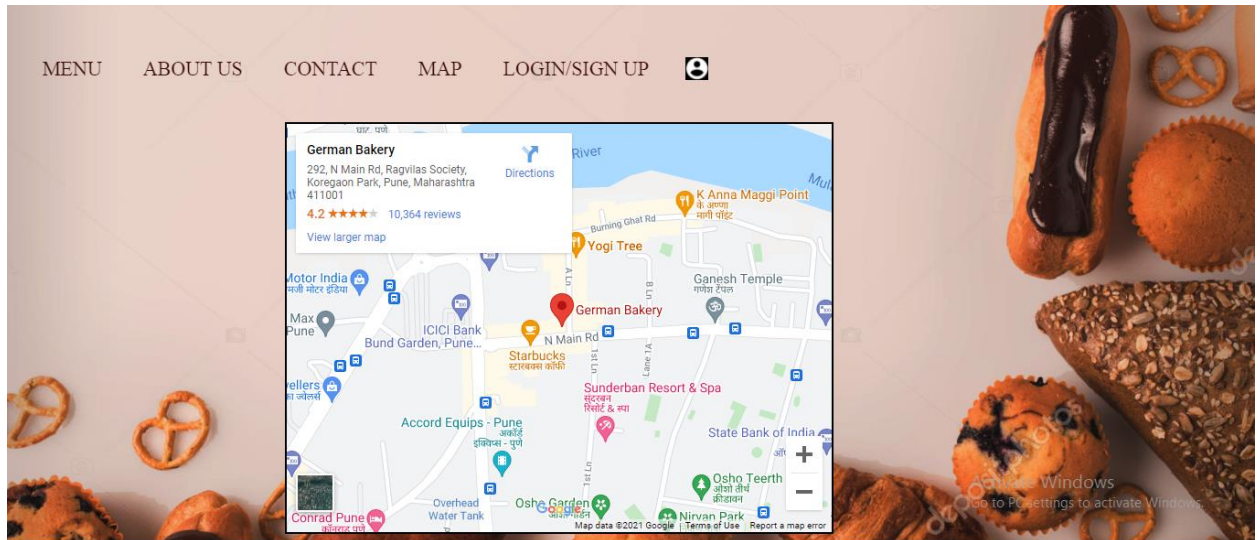

(2)

Screen name: MAP PAGE.

Screen Input: MENU,ABOUTUS,CONTACT,MAP,LOGIN/SIGN UP.

Screen Output: DISPLAY SHOP ON MAP.

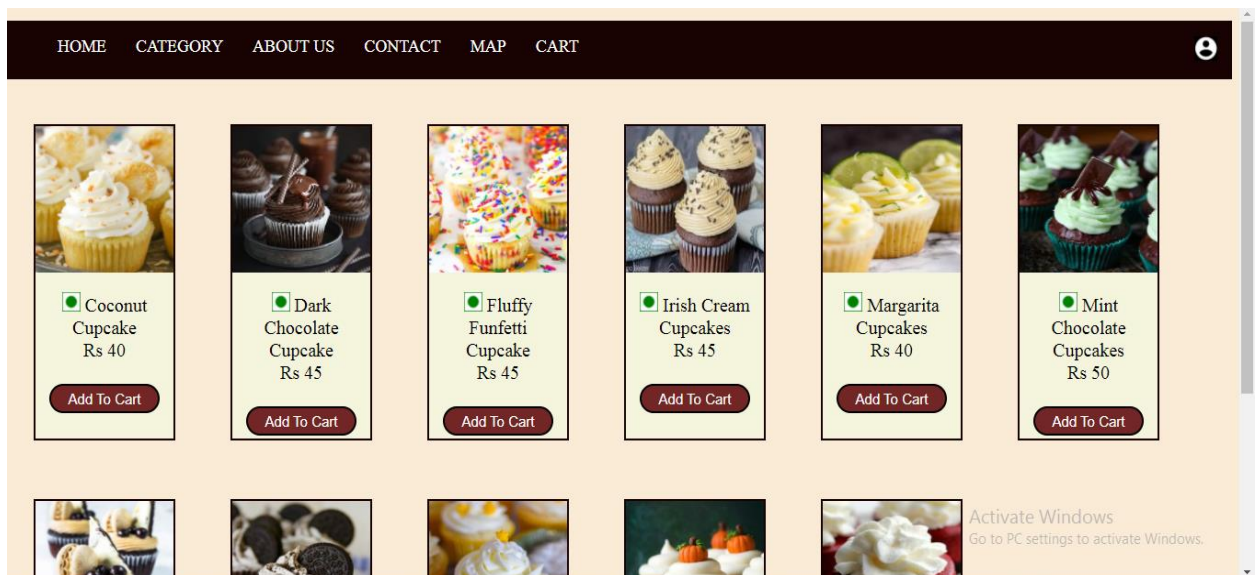

(3)

Screen name: CUPCAKES PAGE.

Screen Input: CATEGORY, HOME, CART,MAP,ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

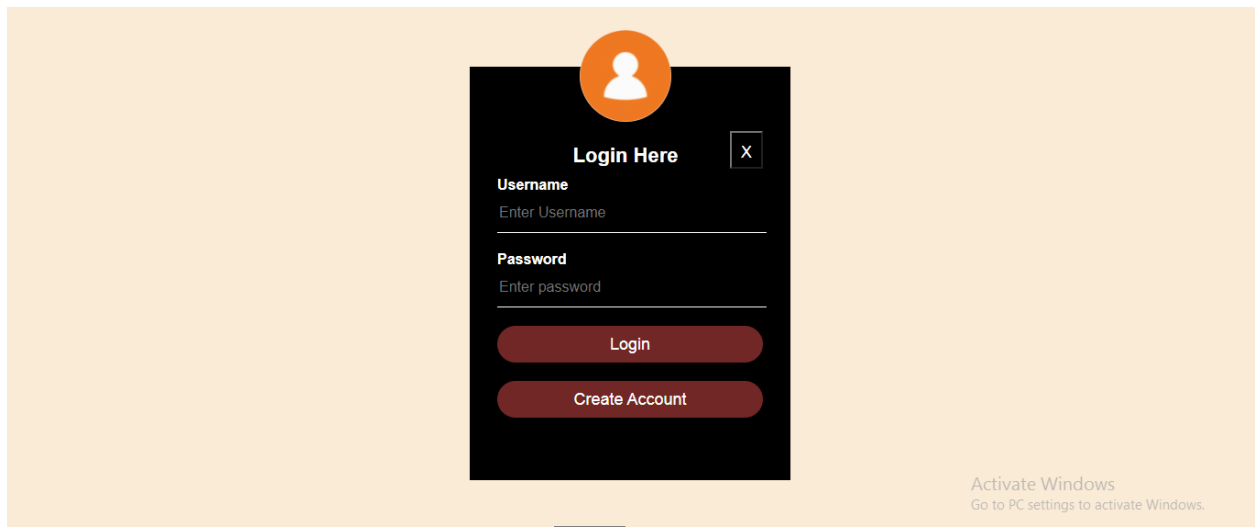

(4)

Screen name: LOGIN.

Screen Input: USERNAME, PASSWORD.

Screen Output: SUCCESSFUL LOGIN.

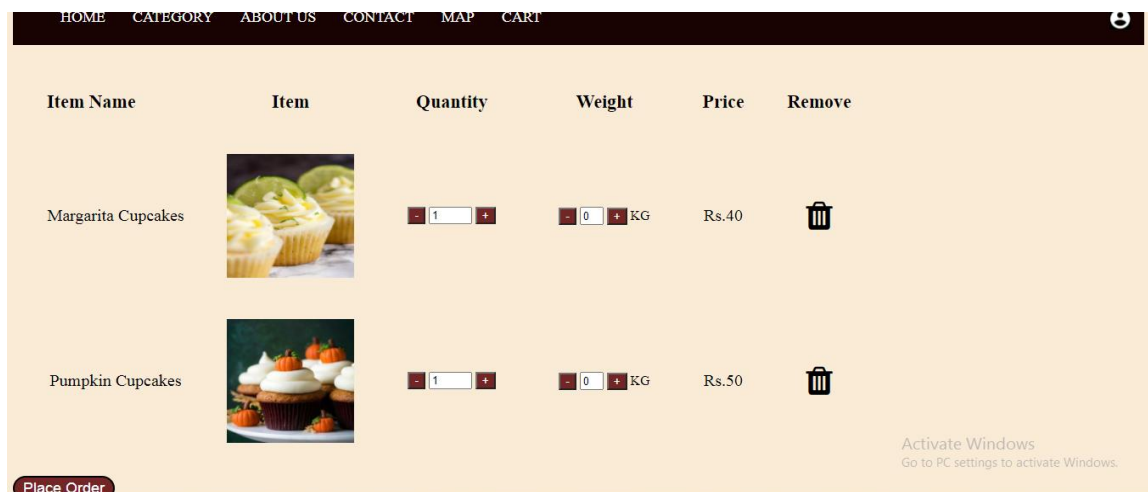

A login screen mockup with a dark blue background. At the top center is a white circular icon with a person silhouette. Below it, the text "Login Here" is displayed in white, followed by a close button with an "X" icon. The form contains two input fields: "Username" with the placeholder text "Enter Username" and "Password" with the placeholder text "Enter password". Below the input fields are two buttons: "Login" and "Create Account". In the bottom right corner, there is a small text that says "Activate Windows Go to PC settings to activate Windows."

(5)

Screen name: CART PAGE.

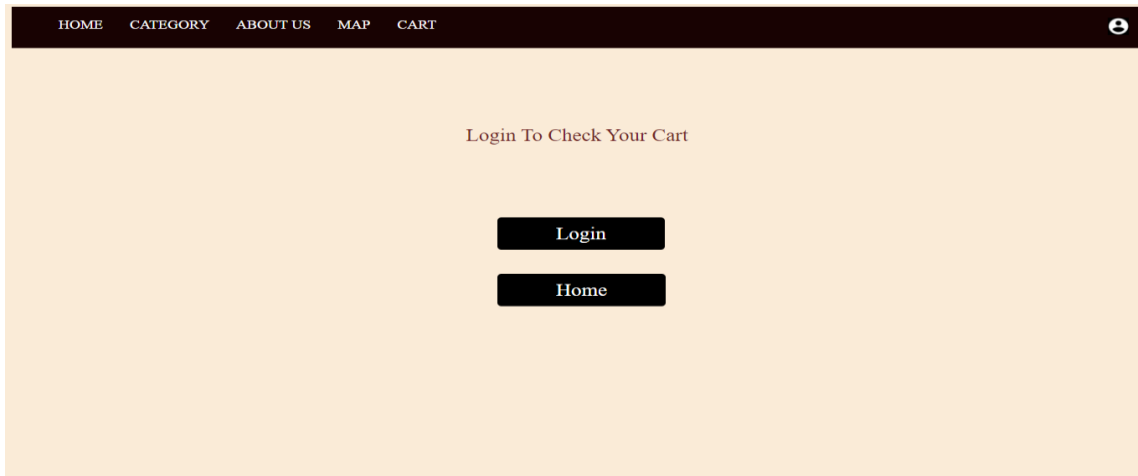

Screen Input: HOME, CATEGORY, ABOUTUS, CONTACT, CART.

Screen Output: ITEM, IMAGE, QUANTITY, WEIGHT, PRICE.

A cart page mockup with a dark blue header. The header contains navigation links: "HOME", "CATEGORY", "ABOUTUS", "CONTACT", "MAP", and "CART". On the right side of the header is a user icon. The main content area has a table with the following columns: "Item Name", "Item", "Quantity", "Weight", "Price", and "Remove". The table contains two rows of items: "Margarita Cupcakes" and "Pumpkin Cupcakes". Each row has a corresponding image, a quantity input field with minus and plus buttons, a weight input field with minus and plus buttons and a "KG" label, a price, and a remove button (trash icon). At the bottom left, there is a "Place Order" button. In the bottom right corner, there is a small text that says "Activate Windows Go to PC settings to activate Windows."

Item Name	Item	Quantity	Weight	Price	Remove
Margarita Cupcakes		- 1 +	- 0 + KG	Rs.40	
Pumpkin Cupcakes		- 1 +	- 0 + KG	Rs.50	

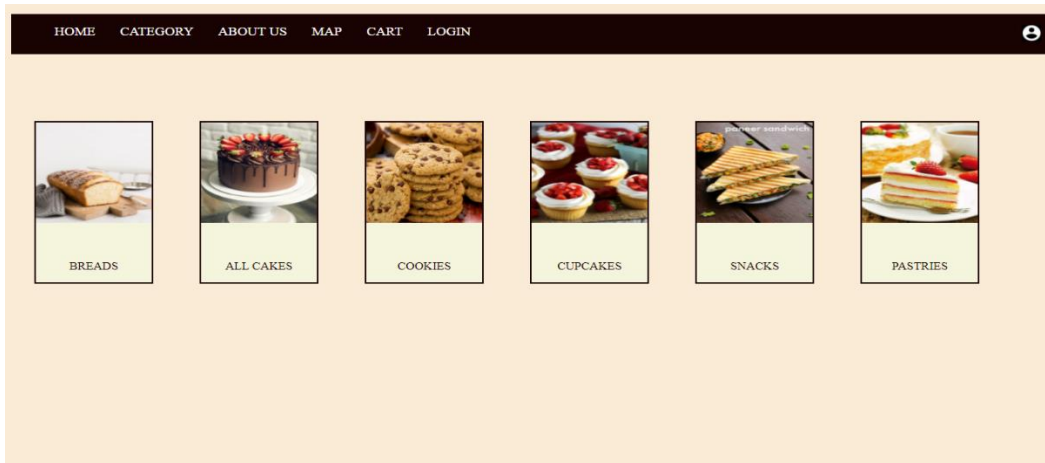

(6)

Screen Name: **CATEGORY PAGE.**

Screen Input: **CAKES,CUPCAKES,PASTRY,SNACKS,COOKIES,BREADS.**

Screen Output: **CATERGORY OF PRODUCTS DISPLAYED.**

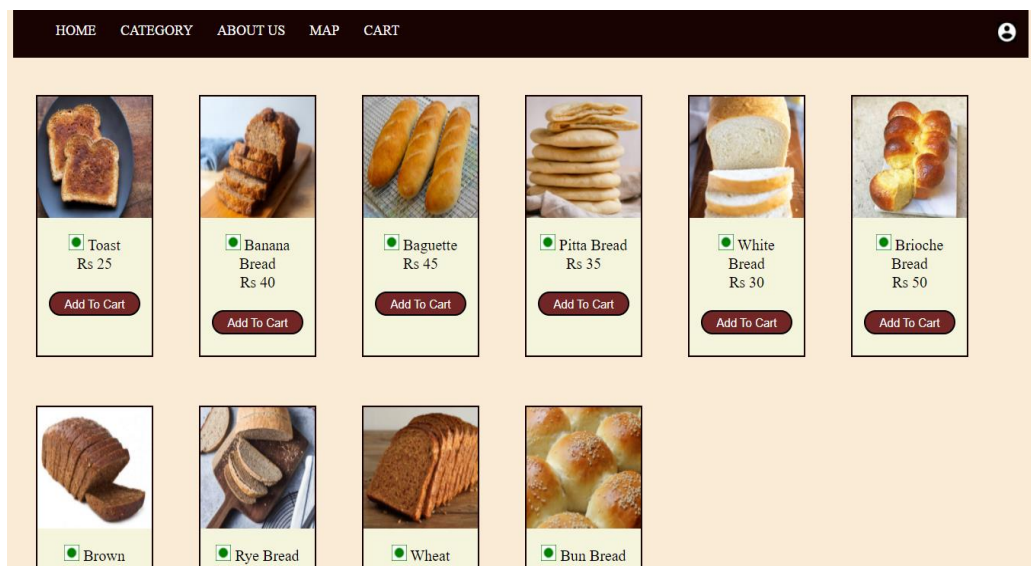

(7)

Screen Name: BREADS PAGE.

Screen Input: CATEGORY, HOME, CART, MAP, ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

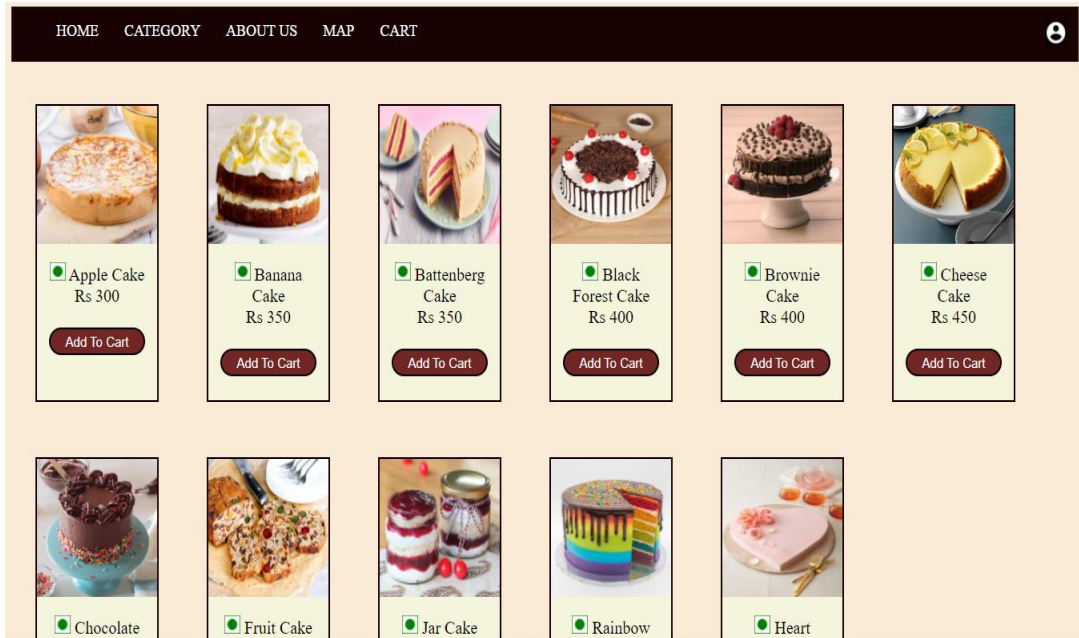

(8)

Screen Name: CAKES PAGE.

Screen Input: CATEGORY, HOME, CART, MAP, ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

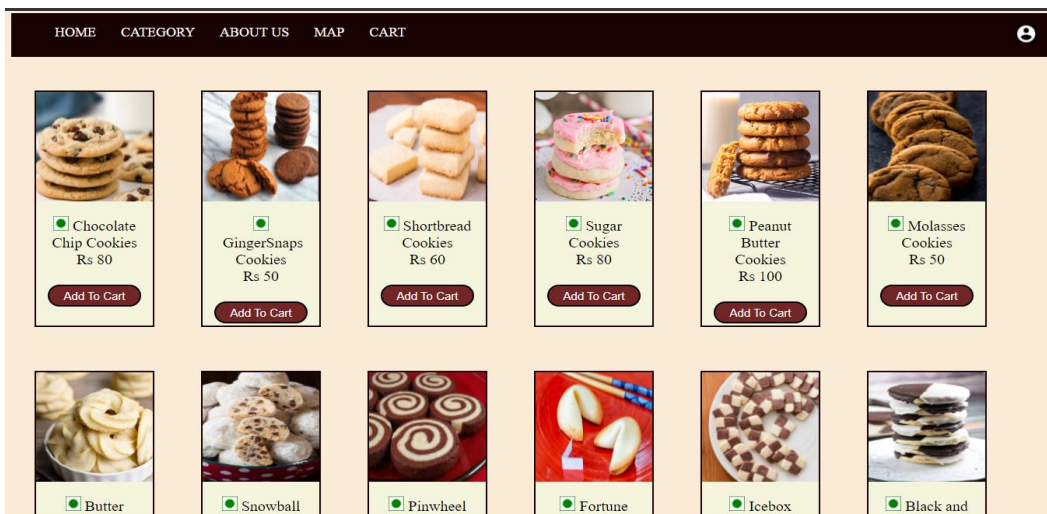

(9)

Screen Name: COOKIES PAGE.

Screen Input: CATEGORY, HOME, CART, MAP, ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

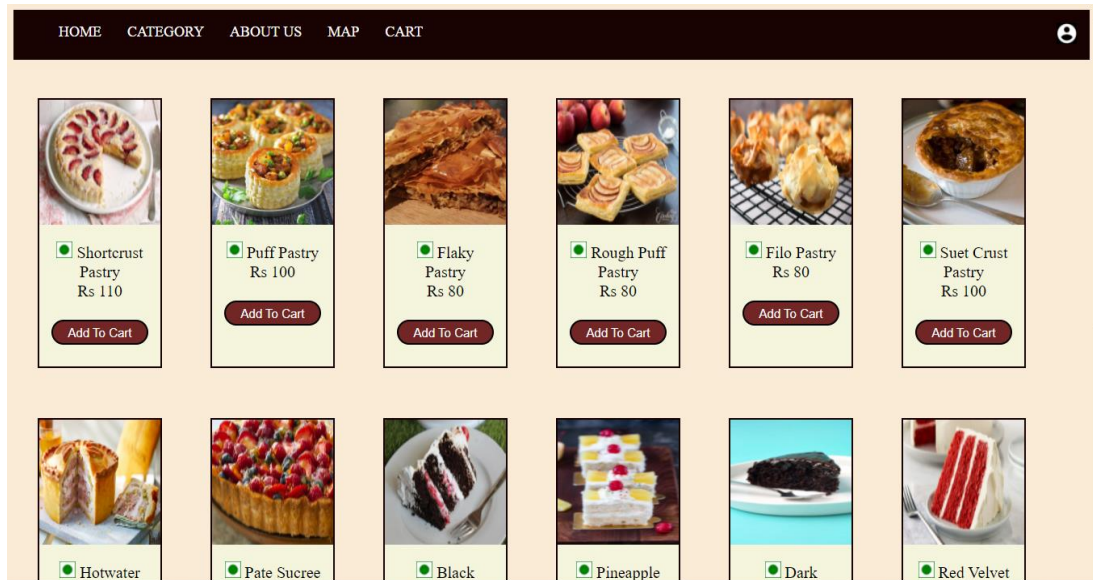

(10)

Screen Name: PASTRIES PAGE.

Screen Input: CATEGORY, HOME, CART, MAP, ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

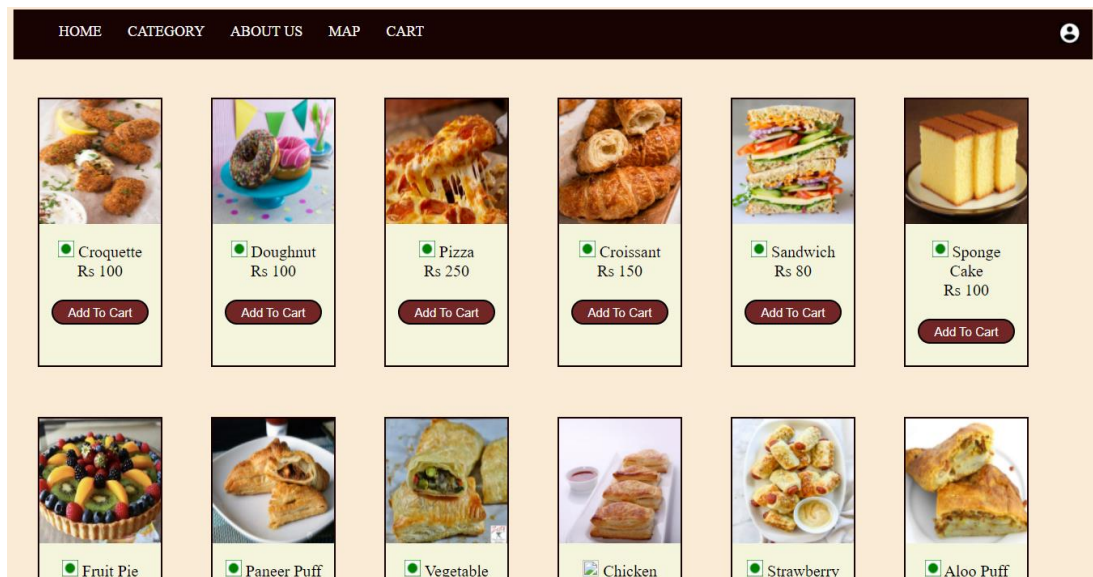

(11)

Screen Name: SNACKS PAGE.

Screen Input: CATEGORY, HOME, CART, MAP, ABOUTUS.

Screen Output: DISPLAY PRODUCTS IN CATEGORY FORM.

(12)

Screen Name: **BILL PAGE.**

Screen Input: **PRODUCTS SELECTED.**

Screen Output: **PRICE, TOTAL, SUB-TOTAL.**

Item Name	Quantity	Price
Red Velvet Cupcakes	1	50
Pizza	1	250
Pinwheel Cookies	1	80
Sub Total:		380
GST(5%):		19
Total:		399

Update Pay Now

(13)

Screen Name: **CUSTOMER DETAILS FOR DELIVERY.**

Screen Input: **NAME, PHONE, LANDMARK, ADDRESS, PIN.**

Screen Output: **PRICE, TOTAL, SUB-TOTAL.**

Order Details

Name : First Name Last Name

Phone No:

Address :

Pin :

Landmark:

Pay Type : ☒ Cash On Delivery ☐ Card Payment

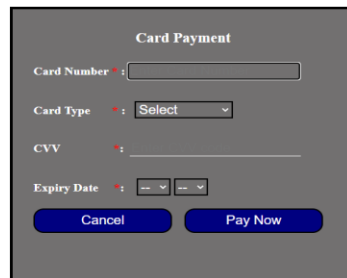

Cancel Continue

(14)

Screen Name: PAYMENT PAGE.

Screen Input: CARD DETAILS.

Screen Output: SUCCESSFUL ONLINE PAYMENT.

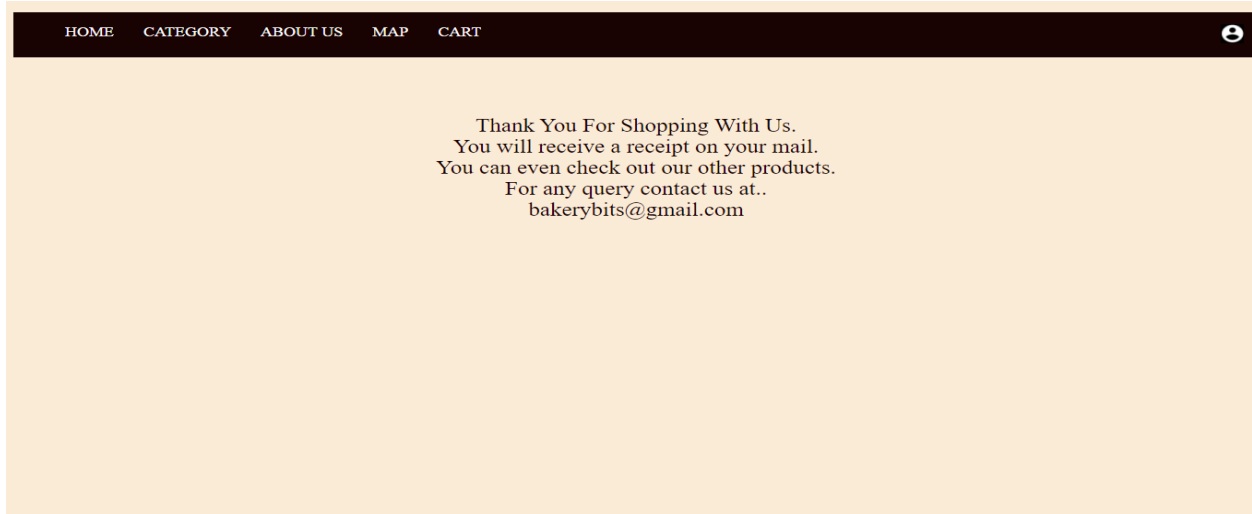

The screenshot shows a 'Card Payment' form with the following fields: 'Card Number' (text input), 'Card Type' (dropdown menu with 'Select' as the current value), 'CVV' (text input), and 'Expiry Date' (two dropdown menus for month and year). At the bottom of the form are two buttons: 'Cancel' and 'Pay Now'.

14)

Screen Name: THANK YOU PAGE.

Screen Input: HOME,MENU,MAP,ABOUT US.

Screen Output: ORDERED SUCCESSFULLY.

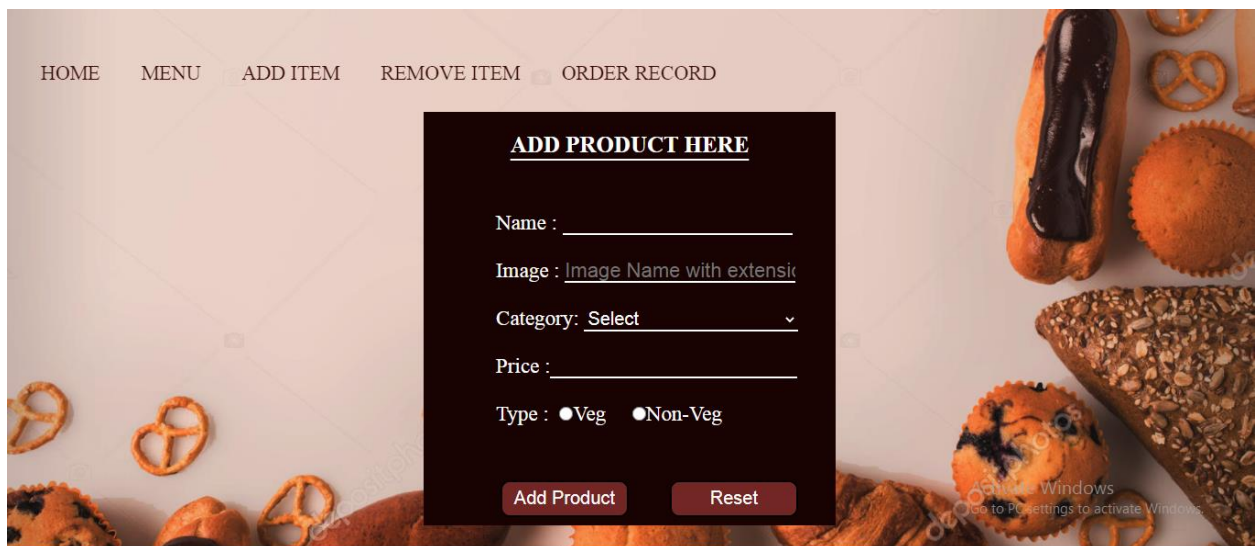

ADMIN SIDE:

(1)

Screen name: ADD PRODUCT PAGE.

Screen Input: NAME, CATEGORY, PRICE, TYPE, IMAGE.

Screen Output: PRODUCT ADDED SUCCESSFULLY.

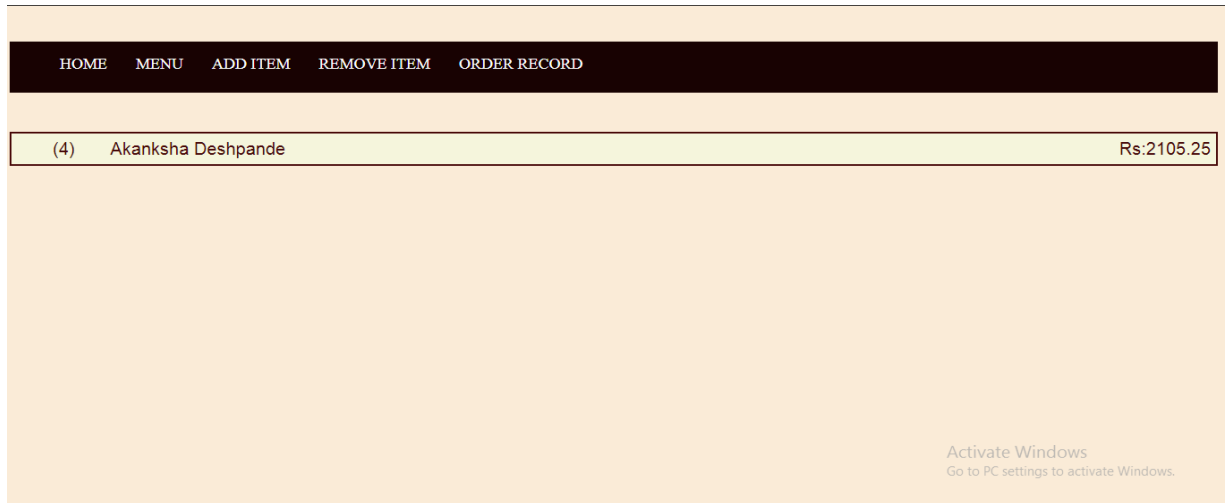

The screenshot shows a web application interface for adding a product. At the top, there is a navigation bar with links: HOME, MENU, ADD ITEM, REMOVE ITEM, and ORDER RECORD. The main content area features a dark brown modal box titled "ADD PRODUCT HERE". Inside the modal, there are input fields for "Name", "Image" (with a placeholder "Image Name with extensio"), "Category" (a dropdown menu showing "Select"), "Price", and "Type" (radio buttons for "Veg" and "Non-Veg"). At the bottom of the modal are two buttons: "Add Product" and "Reset". The background of the application is a light beige color with a faint grid pattern and images of various baked goods like pretzels, donuts, and bread.

(2)

Screen name: ORDER RECORDS.

Screen Input: HOME,MENU,ADD ITEM,REMOVE ITEM,ORDER RECORDS.

Screen Output: DISPLAY ORDERS OF CUSTOMERS.

(3)

Screen name: **ORDER PAGE.**

Screen Input: **HOME,MENU,ADD ITEM,REMOVE ITEM,ORDER RECORDS.**

Screen Output: **DISPLAY DETAILS OF SPECIFIC ORDER.**

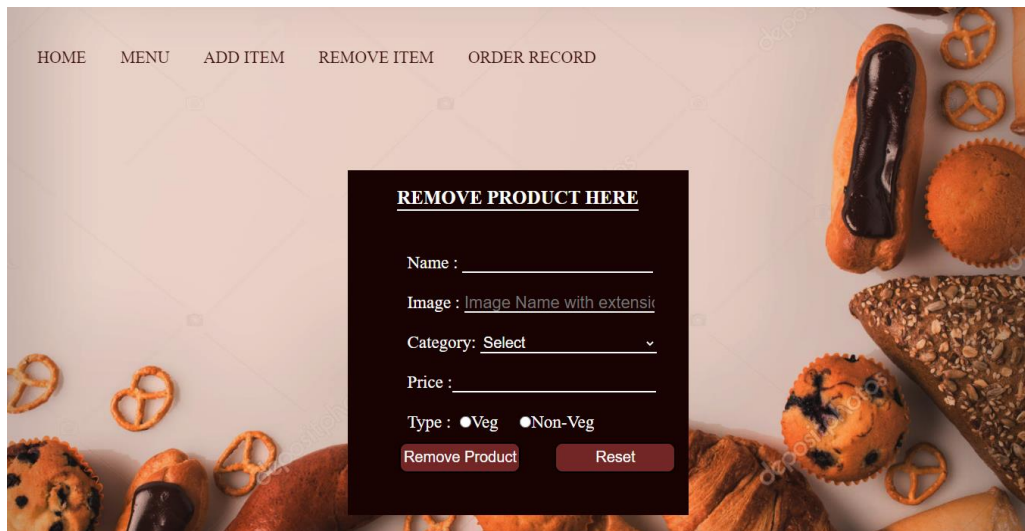

(4)

Screen name: REMOVE PRODUCT PAGE.

Screen Input: NAME, CATEGORY, PRICE, TYPE, IMAGE.

Screen Output: PRODUCT ADDED SUCCESSFULLY.

The screenshot shows a web application interface for removing a product. At the top, a navigation bar contains the links: HOME, MENU, ADD ITEM, REMOVE ITEM, and ORDER RECORD. The main content area features a dark-themed modal form titled "REMOVE PRODUCT HERE". The form includes the following fields and controls:

- Name :
- Image :
- Category: (dropdown menu)
- Price :
- Type : ☐ Veg ☐ Non-Veg
- Buttons: "Remove Product" and "Reset"

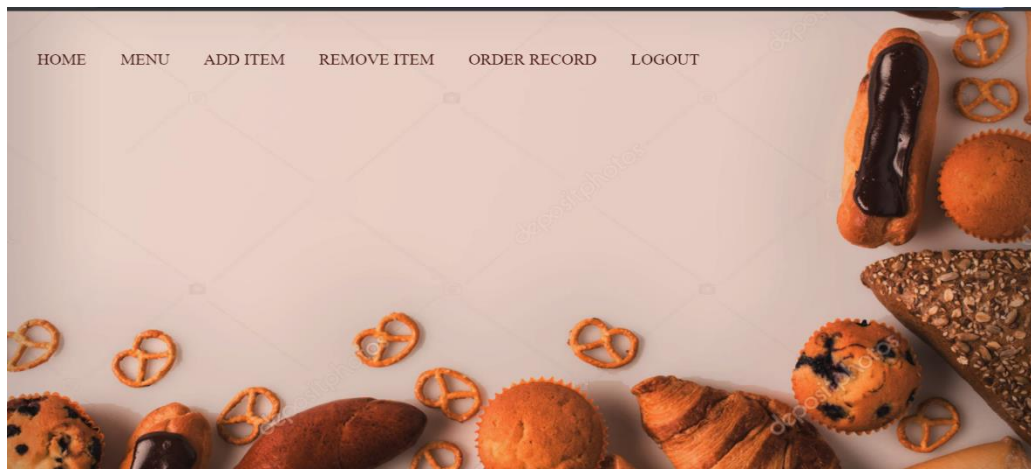

The background of the page is a light-colored surface with various baked goods, including croissants, cookies, and bread, arranged artistically.

(5)

Screen name: ADMIN HOME PAGE.

Screen Input: HOME, MENU,ADD ITEM, REMOVE ITEM,ORDER RECORD.

Screen Output: HOME, MENU,ADD ITEM, REMOVE ITEM,ORDER RECORD.

TEST CASES

Test Case No	Test Case Name	Input	Expected Output	Observed Output
1	Login	Username Password	Home page should be displayed.	Home page is displayed.
2	Registration	Username Name Password Phone Email	Home page should be displayed.	Home page id displayed and information is added to database.
3	Category	Add to cart	Products must be added to cart table in database and must visible in cart.	Products are added to cart table and are visible in cart page.

4.	Cart	Place order	Bill page must be visible.	Displays bill of customer.
5	Bill Page	Pay Now	Order details page must be made visible	Order details page is visible.
6	Order Details	Cash on Delivery	Thank you page must be made visible.	Thank you page is visible.
7	Order Details	Card Payment	Payment page must be visible	Payment page is visible.
8	Payment	Card Details	Thank you page must be visible.	Thank you page is made visible.
9	Admin	Username Password	Admin home page must be visible	Admin home page is visible.

10	Add Product Remove Product	Product name Price Category Type Image Name	Product must get saved or deleted from product table	Product gets saved or deleted from product table.
11	Order Record	Click on customer	Must show details of products ordered	Shows details of orders

CONCLUSION :

In group projects the main focus should be on discussions so that everyone is clear enough with the main idea. It saves a lot of time if everyone does their work on time. The focus should mainly be on making the project dynamic so that alterations to the project can be done in a user friendly way.
